## Wedding Photography

*“Think about the photo before and after, never during. The secret is to take your time. You mustn't go too fast. The subject must forget about you. Then, however, you must be very quick.” -Henri Cartier-Bresson*

My approach to wedding photography involves connecting with the bride and groom to understand their wants and vision in order to immerse ourselves into the moment and emotions of the wedding and to react immediately to what we see going on around us. This connection reflects in the resulting photography and has visual appeal and significance in the resulting images.

The basis for this connection starts with the initial consultation meeting. It is an honor to be asked to record the moments of a wedding. In order to assure my vision and your desires are in harmony, this meeting is the essential foundation to that relationship.

You will find below several packages from very basic to all inclusive. All packages include an engagement photography session to start things off before the wedding. Call me to start the process.
